

We suggest the following potential reviewers for this manuscript because their expertise aligns closely with the paper's integration of intensive longitudinal and dynamic modeling with meta-analytic structural equation modeling:

- **Mike W.-L. Cheung**
Department of Psychology, National University of Singapore
Email: mikewlcheung@nus.edu.sg
Expertise: structural equation modeling, meta-analysis, multilevel models, and quantitative methods.
- **Suzanne Jak**
Programme Group of Methods and Statistics, Faculty of Social and Behavioural Sciences, University of Amsterdam
Email: S.Jak@uva.nl
Expertise: structural equation modeling and meta-analytic structural equation modeling.
- **Guangjian Zhang**
Department of Psychology, University of Notre Dame
Email: gzhang3@nd.edu
Expertise: quantitative methods, psychometrics, and dynamic analysis.
- **Lijuan (Peggy) Wang**
Department of Psychology, University of Notre Dame
Email: lwang4@nd.edu
Expertise: intensive longitudinal data analysis, mediation and moderation analysis, multilevel modeling, Bayesian modeling, and structural equation modeling.
- **Kathleen (Katie) Gates**
Department of Psychology and Neuroscience, University of North Carolina at Chapel Hill
Email: gateskm@email.unc.edu
Expertise: time series analysis, structural equation modeling, graph theory, Fourier analysis, and methods for intensive longitudinal data.
- **Ellen Hamaker**
Methodology and Statistics, Utrecht University
Email: e.l.hamaker@uu.nl
Expertise: longitudinal data analysis, structural equation modelling, and dynamic modeling.
- **Noémi Schuurman**
Methodology and Statistics, Utrecht University
Email: n.k.schuurman@uu.nl
Expertise: dynamic modelling, Bayesian statistics, multilevel analysis, and time series analysis.
- **Laura F. Bringmann**
Department of Psychometrics and Statistics, Faculty of Behavioural and Social Sciences, University of Groningen
Email: l.f.bringmann@rug.nl
Expertise: intensive longitudinal data, experience sampling methods, emotion dynamics, and psychological methods for within-person processes.
